EXPERIENCE

Administrative Assistant (Temporary), Compass Group – Charlotte, NC

March 2025

- Improved operational efficiency by reconciling invoices and maintaining digital records using internal tools.
- Streamlined scheduling and resolved on-site technical issues, reducing downtime for staff and operations.

Retail Technical Vendor (Intel Rep), Best Buy – Charlotte, NC

May 2023 – August 2023

- Advised customers on Intel product features and compatibility for custom PC builds.
- Delivered hardware support and product installation guidance in high-traffic retail settings.

Customer Sales Associate, Lowe's – Charlotte, NC

August 2021 – March 2025

- Provided personalized customer service and technical advice for tools, appliances, and home improvement solutions.
- Trained new hires on internal systems and store workflows, improving team efficiency.
- Maintained high productivity in a fast-paced retail environment, contributing to store goals and positive customer feedback.

Help Desk 1, UNC Asheville – Asheville, NC

August 2020 – May 2021

- Resolved Tier 1 tech issues for students and staff across campus and remote platforms.
- Troubleshoot OS-level errors on Windows/macOS devices, including login failures and driver conflicts.
- Assisted users with network setup, OS updates, and device restoration, improving support satisfaction.

PROJECTS

Budgetly

<https://github.com/ksims20/Budgetly>

React Native, Spring Boot, MySQL, Azure, Terraform

- Developed a personal finance tracking app with a clean, ad-free user experience.
- Rewrote backend using Spring Boot for robust RESTful APIs and database management.
- Automated infrastructure deployment with Terraform on Azure to ensure scalability and security.

Cookly | <https://shorturl.at/BWTrV>

<https://github.com/ksims20/RecipeWebsite2>

JavaScript, Firebase, React, npm, API

- Developed an ad-free, minimalistic recipe website to improve user experience.
- Integrated Firebase for secure user authentication and theMealDB API for recipe fetching.
- Enhanced functionality by implementing filtered search results, reducing clutter for users.

Airplane Game Empathy Builder | <https://shorturl.at/gSfit>

<https://github.com/ksims20/AirplaneTest2>

Unreal Engine 5

- Designed an empathy-driven game simulating stress response to a crying baby on a flight.
- Implemented multiple-choice interactions to encourage user reflection on emotional responses.
- Leveraged Unreal Engine 5 to create immersive scenarios and realistic user interactions.

Socially Relevant Information Project | <https://shorturl.at/MGjsz>

<https://github.com/ksims20/SRI>

HTML, CSS, JavaScript, UX/UI Design

- Created a one-page website promoting mental health awareness through dynamic slideshows.
- Incorporated video backgrounds and smooth transitions for an engaging user experience.
- Designed the UI/UX to effectively communicate the importance of mental health in a visually appealing way.

EDUCATION

University of North Carolina at Asheville, Asheville, NC - BS in Computer Science

May 2024
